Artificial Intelligence Final Project

Smog Level Prediction App

Team Members : Zeina Ayman 202200351 - Nour Helmy 202202012 - Habiba Khalil 202200720 - Farida Mohamed 202202579.

Brief Description : The Smog Level Prediction App is a machine learning tool that predicts vehicle smog levels using vehicle data. It uses a Decision Tree Classifier model and a user-friendly interface. The app helps users assess environmental impact and provides transparency about model performance, contributing to environmental awareness and sustainability efforts.
